

New Sunrise Town Hall & Community Center

Sunrise Township is in the process of designing and building a new town hall and community center to serve the essential functions of township government for the next several decades and beyond.

These functions include administering elections, holding meetings, managing township departments and staff, and storing records and equipment.

We also want the town hall and community center to be an amenity for you, the citizens of Sunrise Township, as our community continues to grow well into the future.

This project is within our current township budget and has been funded through a combination of grants and dedicated funds.

As we enter the design process, we welcome your input.

- Would you like to see the new town hall and community center anchor future economic development in the historic Sunrise downtown area?
- Would you consider using the community center for birthday, graduation, or retirement parties, club meetings, small banquets, and other local events?
- What other ideas do you have for events and amenities at a new town hall and community center?

Please visit the **Sunrise Township MN** Facebook page, and let us know!
